Bath Stands Up

Trade unionists are fighting back
Climate activists are fighting back

YOU

can fight back too!

Millions of people are being forced to choose between eating and heating; The cost of living crisis and the climate crisis are both caused by an economic system that syphons money to the rich, impoverishes the rest of us and burns the planet in the process.

And things are about to get a whole lot worse.

Divide and rule tactics are weakening our society

We want to connect and build alliances.

Our political and economic institutions are falling us.

We can only get through this by working together.
